How to Configure Git Username and Email Address | Linuxize

[\[https://linuxize.com/post/how-to-configure-git-username-and-email\]](https://linuxize.com/post/how-to-configure-git-username-and-email/)

To set your global commit name and email address run the git config command with the --global option: git config --global user.name "Your Name" git config --global user.email "youremail@yourdomain.com". Once done, you can confirm that the information is set by running: git config --list. user.name=Your Name user.email=youremail@yourdomain.com.

Open and use a shared mailbox in Outlook - Microsoft Support

[\[https://support.microsoft.com/en-us/office/open-and-use-a-shared-mailbox-in-outlook-d...\]](https://support.microsoft.com/en-us/office/open-and-use-a-shared-mailbox-in-outlook-d...)

A shared mailbox makes it easy for a group of people to monitor and send email from a public email alias like info@contoso.com. When a person in the group replies to a message sent to the shared mailbox, the email appears to be from the shared address, not from the individual user. You can also use the shared mailbox as a shared team calendar.
